

## Evaluation – results of the Project

15 participants have answered the evaluation until now, and here are the results:

8 participants rated the Learning Partnership very positive, 7 positive.

The participants applied to these statements as following:

Within the Learning Partnership I acquired useful knowledge: 8 fully, 7 mainly.

The knowledge acquired within the Learning Partnership will affect my work sustainably: 3 fully, 11 mainly, 1 partly

The Learning Partnership was consistent with the agreements: 5 fully, 8 mainly, 2 partly

The learning architecture was appropriate to issues in a group: 7 fully, 6 mainly, 2 partly

The outcomes of the learning partnership are beneficial: 9 fully, 6 mainly

The cooperation in the group was enjoyable: 10 fully, 5 mainly

I am satisfied with my own participation in the activities of the learning partnership: 4 fully, 10 mainly, 1 partly

Further remarks:

This has been an incredible experience in learning for me. Probably, the main learning point was that it was possible to experience the diversity during all group processes.

It could be very useful to continue this work in a practice group or in an intervention group to collect our experiences how could this knowledge fit for the practice in our different country, different culture and probably different intercultural effects or problems of our nations.

Important in the whole project was 'learning by doing'. Among other things was the 'dealing' with an ongoing group process and group dynamics. In every phase of the project there was very much attention for these aspects. We learned a lot during this process about the different cultures in the different participating countries.

Many thoughts, know how and expertise was exchanged. The willingness of sharing all the feelings we had about ourselves as a group and to respect one another was always present during our meetings.

A process like this (with members of such a variety of status and competence) should have a more clear leadership).

I appreciate very much that the EU supports this learning partnerships – in all its diversity and I appreciate very much that you Michaela took care of so much.

Hope to see you all in Norwegian next Year!

I realized that a good preparation of a learning partnership plays an important role. As well as clear structure and leadership. This was a good learning input for me, for my future possible partnership. Being together with people from different backgrounds and countries is the unforgettable experience.
